[sales@hlclighting.com](mailto:sales@hlclighting.com)

These Led Lamps run cool to the  
touch and can last up to 40,000 hours  
[ approximately 20years at 6hrs/day ]

***Blue tooth Technology** is available today to add color to your life and flare to your beautiful home. Our "SMART Guni Lamp" will give you the ability to change the color of your light with the touch of your finger using your I phone, I Pad, or Android. With Bluetooth technology you can control the color, the dimming, flashing and slow change of your individual Led lamps or multiple group them [up to 9 units] to work together all at the same time.*

***How it works** - You simply download the Free App " Gunilamp Pro" from your App store onto your I phone, I Pad, or Android - purchase the Led lamps and screw them into any standard 120 volt lamp socket, open the App and go to device management to search for the available lamps - select the lamp or lamps you want to control - then use the back button [home button] and select single control - touch the lamp again to go to the color wheel and functions. The Instructions are on video and available at our website [www.hlclighting.com](http://www.hlclighting.com)*

***NOTE:** If you experience the App is not working you can reset your I phone device by holding down for 5 sec the top right button and then switch it to Off - You can restart your I phone by holding down the top button again for 5 sec. - Also if you forget your password you simply switch the led lamp Off and then ON 5 times until it turns red and it will reset to "0000" factory reset, you can then input a different password.*

*Our SMART Gunilamps are available in 2 models at the present time - Sky lantern [7watts] for \$45.50 /ea and the Balloon Lamp [9.5 watts] for \$47.50/ea .*
